

Nabion® 15

Builder for Home Care detergents

Sodium silicate – soda ash co-granules.

Chemical description

Specifications

Soda ash	50 - 60 %
Sodium silicate	22 - 36 %
Loss on ignition	14 - 18 %
Bulk density	800 - 1000 kg/m ³
Particle size distribution	> 1,6 mm max. 2% < 0,2 mm max. 4%
Whiteness L	> 90
Aspect	white free flowing granules

Properties

High sequestration capacity of Calcium and Magnesium.
High dissolution rate.
Fast dissolution, also in cold water.
Reducing incrustation.
pH buffering and alkalinity source.
Good storage stability.
Low insoluble content.

Applications

Builder for fabric care and automatic dish washing formulations.

Storage

Shelf life at least 36 months when kept in closed bags / containers in a dry place.

Labelling / Safety

Labelling according to EC Guidelines :
H 315 – 318 – 335

Packaging

Big Bag 1 To
Bags 25 kg (max pile height: 2 pallets)

04/2023

Matière première vérifiée par ECOCERT GREENLIFE, conforme au référentiel "NATURAL DETERGENTS AND NATURAL DETERGENTS MADE WITH ORGANIC"
Raw material verified by ECOCERT GREENLIFE, conform to the "NATURAL DETERGENTS AND NATURAL DETERGENTS MADE WITH ORGANIC" Standard
